WELCOME TO THE WORLD OF ELITE BOHEMIA

Nestled in the small town of Semily, just 90 km from Prague, Elite Bohemia is part of the historic Crystal Valley, the birthplace of Czech glassmaking and world renowned Bohemian crystal. This picturesque yet rugged region, rich in natural materials, has shaped generations of master glassmakers.

Our teachers were the craftsmen of old, who inherited their skills from their fathers. We continue to build on their artistry, creating a modern glassmaking company that seamlessly blends traditional craftsmanship with innovative technologies and the evolving desires of our clients.

WHAT IS BOHEMIAN CRYSTAL

Bohemian Czech crystal originated in the 17th century, and by the early 18th century it had already gained worldwide acclaim for its exceptional optical clarity and brilliance.

Chandeliers made from Czech crystal illuminated the palaces of Louis XV, Maria Theresa, Empress Elisabeth, and Osman III, earning a reputation for excellence that endures today.

PRODUCTION OF CRYSTAL CHANDELIERS

Creating a crystal chandelier is a refined process that merges centuries old craftsmanship with modern precision.

It begins with selecting premium quality crystal, expertly cut and polished to maximize brilliance. Each component is then hand assembled, where meticulous attention to detail ensures flawless execution. Crystal elements are paired with hand crafted metal components, carefully shaped and finished to perfection.

The result is a luxurious lighting fixture that illuminates interiors while transforming spaces with elegance and character. Every chandelier is a unique masterpiece, reflecting the skill, dedication, and artistry of its creators.

TRADITIONANAL CRYSTAL CHANDELIERS

Richly decorated fixtures celebrated for their unmistakable sparkle and timeless charm. These pieces appeal especially to those who appreciate classic elegance and traditional design.
